Pilot ERP Free Registration Code PC/Windows

Pilot ERP is a complete enterprise ERP package designed for small to medium size manufacturers or distributors. Pilot ERP is extremely flexible, yet provides the functionality you'd expect from a large ERP package. Pilot ERP is easy to learn and use. Pilot ERP provides every necessary function and option you might need including customizable templates, a vast number of user defined fields and reports, customizable automation, numerous tax and financial functions, and much more. Pilot ERP Features: The following features are included: □ Multi-User - Simply assign users to a project and have them enter data into it through the Web based user interface. The results are automatically sent to other users who can enter their own data into the same project. This allows for multiple people to work on the same data entry, yet have access only to the results that they need! □ Journal Entries - Track all company data with ease. Create journal entries from supplier or customer data at any time. Each individual journal entry can be associated with a particular customer, customer order, supplier invoice or vendor invoice. Journal entries can also be grouped and tracked in projects. You can easily identify which item you're working on by simply double-clicking on the journal entry. □ Email Updates - Create a project and data journal entry within minutes and then send that information to any of your email addresses by using email updates. □ Project Budget - Track the budget of each project in your company by simply tracking vendor and material cost along with each vendor and each material. □ Inventory Control - Store stock, sales and orders in the same place. Create one record for stock, another for sales, and a third for orders. Link these items together into projects and you have an inventory report with easy to read control over what went where. □ Project Tracking - Link your projects to different items and control them through the project tracker. If you need to take a project down for an extended period of time, simply tag it as inactive. □ Quotes - Easily take quotes directly into your system. Get price information for everything from insurance to shipping. Track quotes with items, vendors, customers, supplies, or orders. □ Report Generation - Generate any report you

What's New in the?
